**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. Claims 1-3, 5, 9, 17, 18, 21, and 25-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morimoto et al (6,544,725).

Morimoto et al disclose a silver halide material comprising silver iodochlorobromide grains falling within the scope of the instant claim limitations (column 20, line 12-column 22, line 43). The epitaxial deposits in the 6 corners of the hexagonal grains may be silver bromide or silver iodobromide, and the silver bromide content is preferably 50% or more.

Given the teachings of the reference, it would have been obvious to one of ordinary skill in the art to prepare the material of the reference choosing to employ high bromide epitaxial deposits.
